

NEKO: Nine Lives. One Hoodie. Infinite Possibilities.

White Paper

1. Introduction

NEKO is not just a meme coin—it is a movement. Rising from the ashes, NEKO is designed to prove that meme coins can transcend their traditional role and evolve into a thriving, community-driven ecosystem. With 25% of its supply already burned, no reliance on centralized exchanges, and a bold vision extending beyond 2025, NEKO is here to establish itself as a mainstay in the crypto space.

2. Mission & Vision

Our goal is to create a decentralized, engaging, and sustainable financial ecosystem centered around the NEKO token. As NEKO's popularity grows, we anticipate early investors selling their holdings. However, our commitment remains unwavering:

- The founder currently owns 7% of the supply and will never hold more than 10%.
- This stake will not drop below 7% until:
 - 15% of tokens are used for major CEX listings.
 - Effective marketing strategies have made NEKO a household name.
 - The market cap reaches a stable valuation in the hundreds of millions, with a personal target of \$500M.

3. Tokenomics

Supply Allocation:

- 🔥 **Burnt Supply:** 25% (Sent to the Shiba Inu Dead Wallet)
- 🌐 **Listing & Marketing:** 15%
- 🚀 **Freely Distributed:** 60%
- **Total Supply:** 1 Billion Tokens
